Cost Control Engineer

The Cost Control Engineer is responsible for monitoring, analyzing, and controlling project costs to ensure projects are executed within approved budgets and financial targets. This role works closely with project managers, project controls, procurement, and finance teams to track expenditures, forecast costs, identify variances, and support informed decision-making throughout the project lifecycle.

Responsibilities

- Develop and maintain project cost estimates, budgets, forecasts, and cost reports.
- Monitor project expenditures and track costs against approved budgets and financial baselines.
- Analyze cost performance to identify variances, trends, risks, and potential overruns.
- Prepare cost forecasting, cash flow projections, and financial performance reports for stakeholders.
- Collaborate with project teams to evaluate cost impacts related to scope changes, schedule delays, and resource requirements.
- Review purchase orders, invoices, commitments, and contract expenditures for cost accuracy.
- Support change management by assessing budget impacts and recommending cost mitigation strategies.
- Maintain cost control systems, reporting tools, and project financial documentation.
- Assist with earned value analysis and project performance measurement.
- Support continuous improvement of cost control processes and financial reporting practices.

Qualifications

- Bachelor's degree in Engineering, Finance, Construction Management, Accounting, or related field preferred.
- 8+ years of experience in cost control, project controls, estimating, or financial analysis preferred.
- Strong understanding of budgeting, forecasting, cost analysis, and project financial management.
- Experience with cost control software, ERP systems, spreadsheets, and reporting tools preferred.
- Strong analytical, organizational, and problem-solving skills.
- Excellent communication and reporting abilities.
