Process Supervisor

The Process Supervisor is responsible for overseeing daily operational processes to ensure safe, efficient, and reliable production performance. This role monitors process operations, supervises personnel, and works closely with operations, maintenance, and engineering teams to optimize productivity, maintain quality standards, and support continuous improvement initiatives.

Responsibilities

- Supervise daily process operations and ensure production goals are achieved safely and efficiently.
- Monitor equipment and system performance to identify operational issues or inefficiencies.
- Coordinate with operations, maintenance, and engineering teams to troubleshoot and resolve process-related problems.
- Ensure compliance with company policies, safety regulations, and environmental standards.
- Review operating procedures and implement process improvements to enhance productivity and reliability.
- Train, mentor, and support operators and process personnel.
- Conduct inspections, audits, and performance reviews of operational processes.
- Analyze process data and prepare reports on performance, incidents, and improvement opportunities.
- Support startup, shutdown, and emergency response activities when needed.
- Promote a culture of safety, accountability, and continuous improvement.

Qualifications

- Associate's or bachelor's degree in engineering, Process Technology, Industrial Operations, or related field preferred.
- 7+ years of industrial process, operations, or supervisory experience.
- Strong understanding of process systems, equipment, and operational best practices.
